

WSC 2013-2014, Conference 2

Case 1. Tissue from a dog.

MICROSCOPIC DESCRIPTION:

MORPHOLOGIC DIAGNOSIS:

WSC 2013-2014, Conference 2

Case 2. Tissue from an ox.

(Only the lung is described for points. The lymph node is basically the same, but slightly less complex). Also note that there are two sections that were sent out. I described the one I got, your mileage may vary.)

MICROSCOPIC DESCRIPTION:

MORPHOLOGIC DIAGNOSIS:

CAUSE:

WSC 2013-2014, Conference 2

Case 3. Tissue from a rock hyrax.

MICROSCOPIC DESCRIPTION:

CAUSE:

WSC 2013-2014, Conference 2

Case 4. Tissue from a dog.

MICROSCOPIC DESCRIPTION:

MORPHOLOGIC DIAGNOSIS:
