

WSC 2014-2015, Conference 15

Case 1. Tissue from a mouse.

(This is not a very good descriptive slide, but an important entity, especially in primates and chinchillas. Learn the entity, but let's not spend time describing it, as your time is better spent just about anywhere else... There aren't many points to award here, anyway - a little pneumonia would have helped round out 20 points...)
